

**YOU have  
ransomware?**

**no problem !**

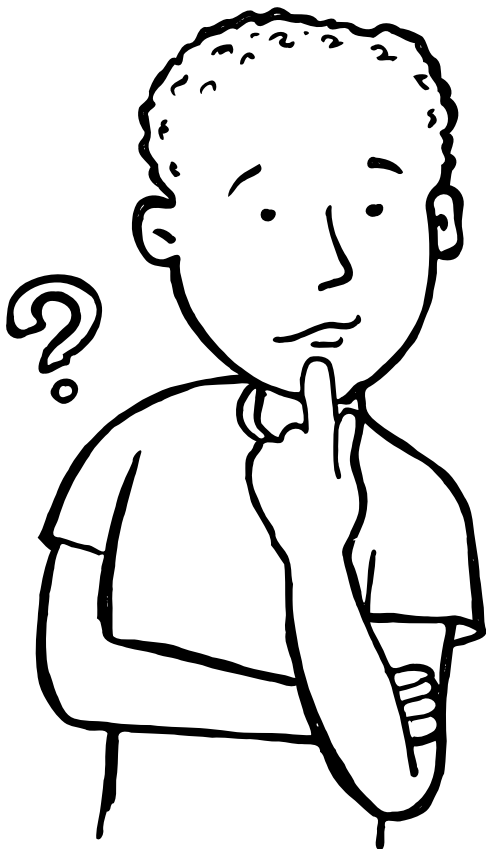

**are under**

**OUR**

**PROTECTION**

# BUT WHAT IS ransomware?

I see you wondering  
down there...

**ransome were?**  
**ran somewere?**

**have i forgot to  
pay my taxes?**

**HET**

**NO**

**OXI.**

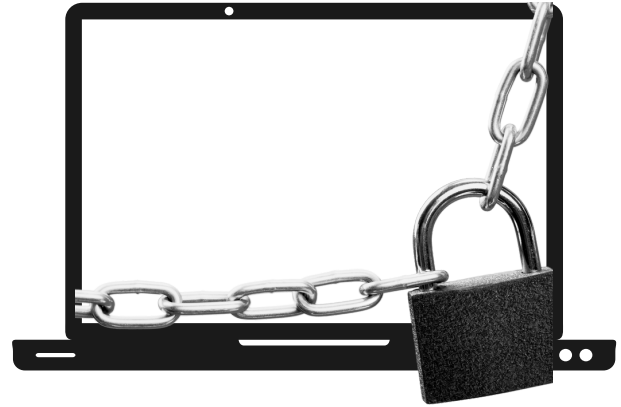

**不**

**رقم**

# **ransomware**

**ransomware is  
a virus that can be  
foolishly  
downloaded  
and locks you out  
of your computer.**

**And here were  
the RANSOME  
part comes in.**

**the one who hacked your  
computer will demand  
money to unlock your  
computer.**

**You are going to  
be ok comrade,  
you just have to  
follow some steps  
to stay safe from  
RANSOMEWERE.**

**terms of service: IF you already  
have ransomware in you computer.  
Your only option is too cry :(**

**1st**

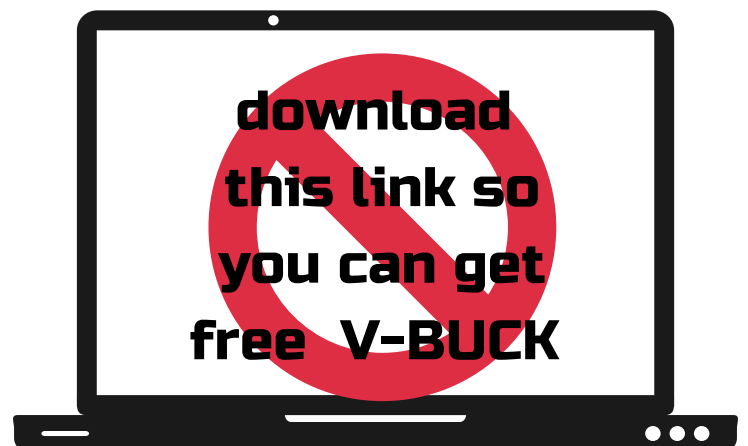

**of all !**

**DO NOT**

**press or  
download  
any weird  
stuff.**

**example:**

2nd....

**oh well there is no  
second.**

**just stay safe and don't  
tap any download links  
that you don't recognize**

**SO EASY**

**now good luck with  
your life.**

**and be care  
full on the  
internet**

**but if you really  
want to fix your  
computer from  
the ransomware.**

**here are some easy  
steps.**

**One thing  
you can do  
is to send  
you  
computer to  
a good  
technician.  
And he  
"maybe save  
some of  
your data.**

**BUT DO NOT PAY  
THE RANSOME  
UNDER ANY  
circumstances.**

**And this  
was the  
safety file  
for keeping  
you safe  
from  
ransomware**

**made in Greece.**
